

Mobilné záhradky

SADENIE OZIMÍN A ZAZIMOVANIE

Posledný októbrový
piatok deti z IX., VI.
a III. odd. ŠKD s p.
vychovávateľkami
pripravili záhradky
na zimu. Vytrhali
burinu, odstránili
suché rastliny,
stonky a korenenky.

Ponechali papriku, ktorá ešte mala plody. Zostali aj rastliny, ktoré sú viacročné - jahody, mäta, medovka.

A photograph showing a group of children and adults working in a garden. In the foreground, a young boy with dark hair, wearing a blue hoodie, is focused on planting a small green strawberry plant into dark, rich soil. To his right, a girl with long blonde hair, wearing a black leather jacket, is also working in the garden. In the background, other children and adults are visible, some with their hands in the soil. The garden bed is bordered by wooden planks. The overall scene is one of a hands-on learning activity in a natural setting.

Do prekyprenej pôdy deti urobili hriadky.

Do nich zasadili malé
sadenice cibulky – oziminy.

A group of children and an adult are working in a wooden garden bed. The bed is filled with dark, rich soil. Several young strawberry plants with green leaves are already planted in rows. A child in a blue hoodie is in the foreground, leaning over and working with the soil. Other children in a white 'GEEK' hoodie and a maroon hoodie are also visible, along with an adult's hand. The scene is outdoors, likely in a school garden or community space.

Pôdu zarovnali a poliali. Ak sa
ozimina ujme, skoro na jar vyrastú
mladé cibulky.

Touto zdravou, vypestovanou zeleninou si deti môžu spestriť olovrant tak ako si pochutili na poslednej úrode paradajok zo záhradky V. odd. ŠKD

Medovka

Mäta

Ďakujem za pozornosť

Prezentáciu pripravila: Ing. Andrea Benčová, vychovávateľka IX. odd. ŠKD, október 2019
